# Fibracolour Plast

# Technical Matt

The combination of acrylic lacquers and electron beam curing (EBC) gives this material excellent surface properties, making it antibacterial, scratch and heat resistant as well as resistant to disinfectant products. Ideal for surfaces with demanding use such as desks, kitchen worktops and other office, kitchen and bathroom furniture.

## Format and availability

3050 x 1220 x 19mm

## Sustainability at FINSA

FINSA is committed to sustainable growth, which extends over the limits of our factories. We obtain our main raw material, timber, from nature and it is our duty to respect and protect it.

From preserving our forests to creating this robust melamine range, we've taken care to ensure we're delivering this range in a sustainable way to you. We're committed to doing more and have a stringent plan in place to continue this work.

We work with industry partners to make sure we hit key milestones on our journey. From Cradle 2 Cradle certification to FSC, we're on track to make FINSA materials as sustainable as possible.

## 12Twenty **SPECIALIST SURFACES** by**FINSA**

A selection of decors and finishes carefully chosen to enhance the value of melamine as a decorative material. Our melamine specials include high gloss, coloured core and ultramatt options to add depth and texture to your projects.

All of FINSA's melamine products are certified antibacterial.
