The NTSROOF® Range

Introducing the NTSROOF® Range

Engineered in-house and manufactured to order, the NTSROOF® range delivers innovative, high-performance roof solutions for a wide range of house projects. Built for reliability, versatility and scalability, the NTSROOF® range is backed by full design support and national delivery.

NTSROOF®

- A panelised roof system designed to be fitted by local tradespeople and supplied nationally.

NTSROOM™

- A complete solution with an integrated floor and roof system, factory-built and ready to install on site.

SUPER-SPAN®

- Wide spanning panelised roof system offering spans of up to 10.2 metres without the need for steel or timber purlins - designed to create more space, faster, and is perfect for large detached homes and dormer bungalows.

NTSROOM™ an integrated floor and roof system

Benefits of NTSROOM™:

- NTSROOM™ is a complete integrated roof and floor system, factory-built and ready to install on site
- Install a pair of semi-detached houses in a day with one delivery, one crane, and one install plan
- British Board of Agrément (BBA) Third-party Certified
- Easy to install by local carpentry teams
- Supply with Assist training available for Supply-Only contracts
- Factory-drilled holes available in the floor cassette system for easy install of pipes and cables on site

The NTSROOF® Panelised Roof System

NTSROOF® panelised roof system

Benefits of the NTSROOF® Panelised Roof System:

- A fully engineered, panelised warm roof solution, designed for easy installation by local tradespeople
- Developed for a variety of house types to help housebuilders build faster, safer and more sustainably
- Reduced on-site construction time and labour costs
- 4 roofs can be installed in 1 day due to its simple but innovative design
- Factory fabrication improves dimensional accuracy
- British Board of Agrément (BBA) Third-party Certified
- Meets insulation standards for Building Regulations A, D, and L
- Industry leading PSi values
- robustdetails® & NHBC compliant
- 10,000 NTSROOF®s successfully supplied and delivered
- Dedicated support throughout the design, fabrication and install process including site visits, detailed packs and technical advice

SUPER-SPAN® - 10.2m span roof system ideal for detached homes and bungalows

Benefits of SUPER-SPAN®:

- SUPER-SPAN is an all-timber roof construction **spanning up to 10.2 metres** eliminating the need for structural internal walls and steels
- Unique load-spreading design makes room space simple to design and easy to detail
- **Ideal for large detached homes or dormer bungalows** with all the benefits of the original NTSROOF® system
- Starting with the dwarf walls and 4-cassette system, a room spanning up to 10.2 metres can be constructed in just 3 hours
- Unique click and fix solution makes installation simple
- No steel beams or padstones helps to reduce embedded carbon in the building
- robustdetails® compliant

Supply with Assist

Supply with Assist - your all-in-one support package for Supply-Only Contracts.

Designed as a **Simple. Safe. Secure.** installation of your NTSROOM™.

Supply with Assist - Key Benefits

- Comprehensive training for installers
- Detailed drawings & specifications
- Support for RAMS documentation
- Direct line for on-site assistance
- Faster installs - up to four plots can be installed in a single day
- Reduced on-site storage needs
- Enhanced site safety
- Less packaging waste
- Fixed pricing for easy budgeting
- Minimised time working at height
- Consistent build quality
- Compliant with Part-L regulations
